SELECTED SCHOOL PROJECTS

Gator Trade - 2020
- Worked as a Product Manager/Team Lead to deliver the project to specs on time
- Built an e-commerce market that will exclusively allow students and faculty to post, search, browse, buy, and sell items
- Worked in a team of 6 students to develop a full WWW application using modern teamwork, SE processes and tools
- Performed user interviews, created storyboards, produced use cases and assessed market validation
- Created a high level overview for the team based on the needs of users while adhering to strict guidelines
- Experience working remotely through Zoom
- Application runs on AWS with a MySQL database and used Node.js for the backend and BootStrap, SASS, Express.js, Google Analytics for the front end

Portfolio - 2019
- Designed and brought to life a webpage for showcasing personal projects
- Used HTML5, CSS3, Javascript as well as Bootstrap and AoS libraries
- The biggest challenge was understanding responsive web design
- Overcame the challenge through re-learning CSS3 and understanding Bootstrap functionalities

Tank Wars - 2018
- Developed a functional split screen two player game with a mini-map as well
- Java was the main language implemented and also used the JSwing package
- The biggest challenge was implementing collision elements and learning the functions of JSwing
